

# Bishop Edward King Chapel

case study  
By Rui Guo

Location: Oxfordshire, United Kingdom

**Architect:** Niall McLaughlin Architects

**Owner:** Ripon Theological College

**Year of completion:** 2013

**Climate:** Oceanic climate (Cfb)

**Material of interest:** ship-like timber structure

**Application:** structure

**Properties of material:** The timber structure is pre-fabricated Glulam sections with steel fixing and steel base joints which appear as spruce texture and whitewashed finish. The structure looks very light and illuminated by the natural light which created the holy atmosphere. The structure is designed to emphasize the ellipse geometry of the exterior structure to shape the central hidden nave.
